BOOK SYNOPSIS

This book has been a long time in the making. The computerization activities described in these pages began in 1977 at the Department of Veterans Affairs (VA), but we devoted most of our focus and efforts to building and then implementing the extensive hospital information system known as the Decentralized Hospital Computer System (DHCP) throughout VA. Delivering the product has been our primary goal. We spent relatively little time documenting or describing our experiences or lessons learned. Except for some presentations at national meetings and a relatively few publications, almost none of which were in the standard trade journals read by Chief Information Officers (CIOs) and equivalent top managers in the private and nonprofit sectors, VAs accomplishments remained a well-kept secret. In 1988, Helly Orthner encouraged VA staff to consider writing a book, but the press of day-to-day activities always seemed to take precedence, and the book languished on the back burner.
